Education

Toronto Metropolitan University (Formerly Ryerson University)

Sep 2021 – Apr 2025

Bachelor of Science (BSc) - Honours Specialization in Computer Science

Toronto, ON

- **Coursework:** Algorithms, Data Structures, Databases, Object Oriented Programming, Data Mining, Artificial Intelligence, Software Engineering, Distributed Systems, Operating Systems

Work Experience

Stephen Lewis Foundation

Oct 2024 – Present

Program Officer - Data & Power BI Developer

Toronto, ON

- Designed and deployed an **AI-powered Power BI dashboard** that automatically generates visuals and insights from Microsoft Forms submissions, reducing manual reporting time by **50%**
- Leveraged **Azure AI** and **Power BI Copilot** to implement natural language querying and automated trend detection, enhancing data storytelling for leadership reports
- Collaborated with cross-functional teams to define data requirements, delivering insights that supported funding strategies and improved stakeholder reporting efficiency

Muia Consulting

Sep 2025 – Dec 2025

Software Engineer - AI (Contract)

Toronto, ON

- Led the Full-Stack development of a tax processing platform supporting automated document ingestion and structured data extraction
- Developed scalable **FastAPI** backend services and a **Vue.js (Vite)** frontend to upload, validate, and process tax documents
- Engineered backend validation and data-check pipelines, achieving **98% processing accuracy** across supported tax documents
- Integrated secure **Google Drive OAuth 2.0** workflows to automatically store generated tax filings and documents

Aquazen Services

May 2025 – Aug 2025

Full-Stack Developer

Toronto, ON

- Revamped a full-stack web app by modernizing **Next.js** front-end components and integrating **Redux**, boosting scalability and enabling faster feature development
- Optimized **REST APIs** in **Node.js + PostgreSQL**, cutting response latency by **20%** and improving system efficiency across endpoints
- Designed and validated relational database schemas, optimizing query performance and enforcing data integrity
- Collaborated in an **Agile environment**, participating in sprint planning, peer code reviews, and Git-based release workflows to deliver production-ready features

Riipen

Jan 2025 – Apr 2025

Web Developer - DJ Business Site

Toronto, ON

- Delivered a production-ready website following **Scrum**, contributing to sprint planning, stand-ups, and backlog refinement
- Applied **SEO** best practices using structured metadata and analytics insights, increasing user traffic by **25%** and improving site reliability
- Integrated the **Google Business Profile API** to display real-time reviews within the website, boosting user engagement and confidence

Equitable Bank

May 2022 – Dec 2022

Cloud & DevOps Engineer Intern

Toronto, ON

- Built automated CI/CD pipelines with **Jenkins**, cutting manual deployments by **30%** and increasing delivery speed and consistency
- Collaborated with Developers and QA to analyze defects, perform impact assessments, and implement secure fixes aligned with SDLC and compliance standards
- Deployed monitoring dashboards with **Kibana**, improving system visibility and reducing incident response time by **25%**
- Documented system configurations, deployment processes, and environment requirements in **Confluence**, streamlining onboarding and reducing ramp-up time

Projects

Forge Fit | React, JavaScript, Firebase, OpenAI API

- Built a workout platform with React, Node.js, and Firebase for secure user access and real-time fitness tracking
- Integrated an **AI chat-bot** to deliver personalized plans, and fitness tailored health information through a trained model
- Implemented **progress tracking dashboards** with Chart.js, enabling performance analytics and historical data visualization
- Added secure **authentication and profiles** with Firebase Auth, ensuring data security and a personalized user experience

Car Safety Dataset Evaluation | Python, scikit-learn, Pandas, NumPy

- Built and trained multiple supervised ML models (**Decision Tree, Random Forest, KNN, Naive Bayes, SVM**) on the UCI Car Evaluation dataset, achieving **98% accuracy**
- Optimized model performance through **data preprocessing, feature engineering, and hyperparameter tuning**, improving reliability across safety classes

Skills

Languages: Python · Java · JavaScript · TypeScript · HTML/CSS · SQL · C++/C# · Bash

Frameworks/Libraries: FastAPI · OAuth 2.0 · Vue.js · React · Node.js · Spring Boot · GraphQL · Pandas · NumPy

Cloud/DevOps: GCP · Google Drive API · Docker · GitHub Actions · Jenkins · CI/CD · AWS · Azure

Databases/Tools: REST APIs · PostgreSQL · MySQL · Firebase · Git · Jira · Postman · Confluence · Kibana · Power BI
